Fundamentals of Static Testing

Essential Testing Techniques in Software Development

Mastering Test Management and Tools

Apr 30, 2026

Oanh Kieu Le

has successfully completed the online Specialization

Software Testing Fundamentals for ISTQB Exams Prep

This program equips learners with comprehensive knowledge and skills in foundational software testing, preparing them for the ISTQB Foundation Level certification. Participants will master techniques such as static and dynamic testing, risk-based testing, and defect management, along with practical expertise in using industry-standard tools for test planning, execution, and automation. By completing this specialization, learners are prepared to enhance software quality and reliability in any software development environment.
